

DrainGap™ FS

Introducing DrainGap™ FS: The Ultimate Air Gap Solution for Floor Drains

DrainGap™ FS is a groundbreaking fixed air gap designed to protect floor drains and sanitary floor sinks from cross-connections and contamination. Its simple, glue-free installation fits easily into existing drainage systems, securing drain lines while minimizing splashing. Ideal for commercial kitchens, healthcare facilities, and residential spaces, it ensures compliance with plumbing codes and enhances overall safety.

DrainGap™ FS eliminates slip hazards from loose drain lines and provides long-lasting performance. Its patent-pending design offers superior durability, making it the perfect choice for improving hygiene and safety in any setting.

COMPLIES WITH:

- ✓ ASME A112.1.2 ✓ ASME A112.6.3 ✓ ASME A112.6.7

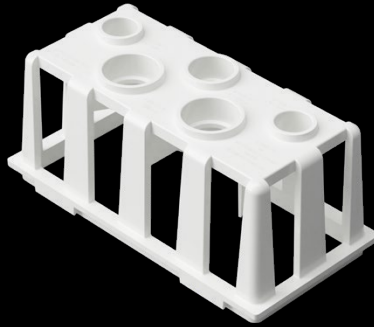

- Saves time and money by eliminating the need to fabricate a makeshift air gap on site
- Prevents cross-connection and contamination
- Secures drain lines and reduces slip hazards
- Easy installation on existing drains
- Minimizes splashing for a cleaner workspace
- Ensures compliance with plumbing codes
- Patented design for long-term performance
